

Rolling Feet Craft

Supplies

1. Precut PVC pipe
2. Wooden skewers
3. Straws
4. Markers
5. Tape
6. Construction paper of assorted colors
7. Scissors

Procedure

1. Draw a foot on a folded piece of construction paper. Cut it out then you have two feet. And use a marker to outline feet.

2. Cut wooden skewers. Teachers will need to help cut skewers. **TIP:** score skewer with scissors and bend skewer to break.

3. Tape one skewer to the lower bottom of the PVC on one side and tape another skewer to the top of the PVC on the opposite side.

4. Tape straw to feet and cut straw to size to fit onto skewer.

5. Insert feet onto the skewers and roll PVC to see feet “walking.”

6. Children can race their feet to see which feet are faster.
7. When the craft is complete, please return clear bin with supplies to the storage room. All the supplies can be left in the bin and put on the white table—no need to put back each individual supply.
